

Knowledge Test Day 1

MACHINE LEARNING OPERATIONS

Which one is a common use of Machine Learning?

- A. Watching TV**
- B. Predicting house prices**
- C. Writing books by hand**
- D. Cooking food**

Which one is a common use of Machine Learning?

- A. Watching TV
- B. Predicting house prices**
- C. Writing books by hand
- D. Cooking food

What is the primary goal of Machine Learning (ML)?

- A. To write explicit rules for software to follow**
- B. To allow systems to learn patterns from data and make predictions**
- C. To create static programs that do not change behavior**
- D. To replace databases with neural networks**

What is the primary goal of Machine Learning (ML)?

- A. To write explicit rules for software to follow
- B. To allow systems to learn patterns from data and make predictions**
- C. To create static programs that do not change behavior
- D. To replace databases with neural networks

In supervised learning, what do we give the computer to learn from?

- A. Games**
- B. Data with answers (labels)**
- C. Music**
- D. Movies**

In supervised learning, what do we give the computer to learn from?

- A. Games**
- B. Data with answers (labels)**
- C. Music**
- D. Movies**

What is classification used for?

- A. Predicting numbers**
- B. Grouping words**
- C. Predicting categories like “spam” or “not spam”**
- D. Drawing pictures**

What is classification used for?

- A. Predicting numbers**
- B. Grouping words**
- C. Predicting categories like “spam” or “not spam”**
- D. Drawing pictures**

What does `train_test_split()` do in scikit-learn?

- A. It teaches robots to cook
- B. It mixes data randomly
- C. It splits data into training and testing parts
- D. It deletes the dataset

What does `train_test_split()` do in scikit-learn?

- A. It teaches robots to cook
- B. It mixes data randomly
- C. It splits data into training and testing parts
- D. It deletes the dataset
